Multilayer Flexible Packaging

Vienna / 2019

Multilayer Flexible Packaging 2019 is the 12th edition of the international forum providing essential data and insights relevant to all companies involved in the manufacture and specification of flexible packaging. The conference attracts international players from across the supply chain to discuss technical and commercial challenges and opportunities over a focused two-day programme.

The conference will look at innovations in raw materials, packaging films and converting, which all work collectively to ensure product quality and safety.

New environmental legislation and pledges are shaping materials research and development as well as end-of-life options and recycled content. This will be explored from multiple viewpoints during the conference.

The enhancement of barrier properties in multilayer structures is also seeing significant development, helping boost shelf life and prevent product waste. Leading plastics processing experts will share new developments in high barrier film solutions.

Multilayer Flexible Packaging 2019 offers a dynamic forum to debate and exchange ideas with industry peers and potential customers in a climate of increased industry-wide collaboration.

In addition, the event offers high-level networking opportunities in a focused exhibition area featuring displays from a range of suppliers.

It was a great conference! Very well organised, diverse and very good speakers and the excellent possibility for the networking. Great opportunity!

Mitsui Chemicals Group

Mitsui Chemicals contributes to society through its innovative, performance-driven products and technologies which are widely used in many different fields of application, such as the automotive industry, packaging markets, the electronics & information sector as well as in environment- and energy-driven industries. In the multilayer film sector, ADMER™ adhesive resins are well-known as the most efficient tie layers to achieve strong bonding between polyolefins and barrier materials in coextrusion film and sheet production.

Since almost 40 years, ADMER™ tie resins set the benchmark in terms of product quality, global availability and regulatory awareness.

Five good reasons to attend:

- **Gain competitive advantage by learning about the latest material, technical and machinery innovations**
- **Explore innovations in high barrier technology**
- **Discover how the flexible packaging industry is innovating to support sustainability initiatives**
- **Benchmark your company against other leading players**
- **Network with buyers, converters, manufacturers, researchers and industry suppliers**

Ways to get involved:
